

Groundhog Research Project

Here's what we learned about groundhogs:

Groundhogs are also called woodchucks.

Groundhogs live in northern North America.

Groundhogs are rodents, like mice, rats, beavers and squirrels.

Groundhogs are mammals.

Groundhogs have small ears and a short tail.

A groundhog's fur is brownish-gray.

Groundhogs have sensory whiskers.

Groundhogs have 4 large fingers and a very tiny thumb.

Groundhogs have black hands with claws.

Groundhogs use their strong claws to dig.

Groundhog's feet have 5 toes with claws.

Groundhogs can swim.
